UNIVERSA 500 SERVO FS and UNIVERSA 800 SERVO FS

The UNIVERSA SERVO FS is a hybrid that closes the gap between intermittent motion and continuous motion lap sealers. It is the first time that a single machine can offer combined advantages of both machine types. Perfect packaging results for highest requirements. Distortion-free, accurately dimensioned square bags for high impact retail packaging without film residue. Most popular type of packaging for premium chocolate manufacturers worldwide.

Technical specifications

		Universa 500 Servo FS	Universa 800 Servo FS
Transverse seal bar, length	[mm]	550	850
Product clearance height	[mm]	200	250
